

# Glaucoma, eyes bleeding

Life

Kavitha - Singapore

I was diagnosed with Glaucoma. After laser treatment in 2006 the bleeding continued. An operation had a 50% risk of me going blind. In 2007 I experienced God's power after I was baptized and received the Holy Spirit. In early 2008 I went up for prayers as my eyes were blurry. During a check-up doctors found no signs of bleeding and later confirmed that my eyes were fully healed. Praise the Lord!
