

Killer disease - Malaria

Life

Eddie, Kitwe, Zambia

Eddie was born on the 25 June 2006. He is the last born child of Sister Emeldah and Pastor Eddie of Zambia Revival Fellowship.

In January 2007 he was found with a killer disease known as Malaria. He became very sick. Only the mother was at home but his father was 400km away from the family on a church visit in the region of Mwinilunga, of the N.W. Province of Zambia.

The child's condition was very bad, weak, later on he fainted and became unconscious.

Sister Emeldah phoned the husband about the situation of the child and she stood firm praying for him while Pastor Eddie was also praying far away from home. The condition became stable the very evening and a few hours later the child was instantly healed by God.

Glory be to God for healing young Eddie.
