

# HIV negative after being born again

Life

**I was married and my husband was a womanizer and he went with many women and he got HIV AIDS.**

He gave the disease to me and I got treatment and I gave it to my child and after seven months the baby died.

The doctor told me I was HIV positive and that I was about to die.

I said before I die I must receive the Holy Spirit so I repented, got baptized on the 13<sup>th</sup> of March 2006 and received the Holy Spirit.

I got healed from the HIV. I went to the doctor at the hospital and they did a blood test.

They said that before I was HIV positive but after receiving the Holy Spirit the blood test was negative.

I am enjoying fellowship in the Lord for 8 years now. I am still healthy.
