

God had healed my wife's AIDS

Life

I would like to testify what God our Lord has done in my life. He changed me and He brought me to this stage and I really enjoy this new life.

The first thing I'd like to testify;

When I was at home in my village I usually stay with my parents and life with the parents is easy for me to find food and the other things I wanted.

When I came to Port Moresby my life is going tough and I would like to find enjoyment but wherever I go I usually face a hardship in my life.

One of the sisters, she is now my wife (or my one body) she witnessed me to know the Lord so one Sunday I said I will go down to Nine Mile where your Fellowship is. I was sitting there and I observe everything and at the end I got baptized.

After one month God gave me His Holy Spirit and I spoke in other tongue. I know that every bad things that had followed me in my life I buried in the water of baptism and I came up a new brain man. I was really enjoying that fellowship with God. I know that God really wants me to follow Him. He has got a plan in my life, that's why I really accept what my now wife said.

My wife, she came out from HIV AIDS when she came to the Lord. She was so sick and we haven't got any medicine here but God healed her and now she is in the church almost 4 to 5 years and we really enjoy that. I knew that she already had had this sickness. I got married to her. Sometimes I went to the hospital to check my blood but my blood, I found that it's negative and I really praise God. We are having real fellowship with God and we know the truth that God give us through His Son and we are really enjoying our fellowship with Him together.

Leader Ishmael Maima, Port Moresby, PNG
