

God healed my HIV sickness

Life

My life testimony goes like this. I was a rascal/criminal. When I had money I went to the night clubs and did all things that were done in night clubs. That was the life that I was enjoying.

In 2004 I had a big problem. I was sick, had a bad cough and lost weight. I tried medicine but couldn't get help. The doctor took my blood and found I was HIV positive so I stayed in the house.

One of my brothers was fellowshipping in the Revival Centres of PNG and he came in to see me and told me to repent, be baptized and receive the Holy Spirit. So I followed him and went to a Revival Centre meeting and observed the fellowship and heard the testimonies.

Then the good news, the pastor put out an altar call to be baptized and receive the Holy Spirit, I raised my hand. I repented, went through the waters of baptism and received the Holy Spirit and spoke in strange tongues, date October 2004.

First miracle - God gave me the Holy Spirit and changed my tongue,

Second miracle - God healed my HIV sickness,

Third miracle - My life changed and I praise God.

Thank you and God bless.
