

## TWO BLOOD TESTS PROVE GOD HEALED MY VERY BIG AIDS SICKNESS

One day I got a request from one lady. She knew that she was sick with AIDS, so she decided to pass the sickness onto me. A few months later I got a very big sickness and I feel that I will definitely die. I came to Port Moresby for the blood test which confirmed I was HIV positive.

My life had totally revolved around playing sports and gambling. I was involved with dancing, stealing and also in tribal fighting. I went deep through all such things described in the book of Galatians 5:19-21.

When I got to Port Moresby I met brothers and sisters from the Revival Fellowship of PNG, they witnessed to me and told me about the Bible Scriptures John 3:3-5, Acts 2:38, Romans 8:9, Acts 19:2 and some others.

I went to observe the fellowship meeting at the "Nine Mile" and every word that was preached by the Pastor convinced me. So I repented, was baptised by full immersion of water and I received the Holy Spirit speaking in other tongues on 26/01/02

I thank God that the heavy sickness that I had in my body was released. God healed me; two blood tests from the Port Moresby Hospital prove no more AIDS sickness!

In 2004 I walked with ninety nine brothers and sisters over the Kokoda Trail to the Popondetta Rally. We did lots of witnessing on the way. I walked back after the Rally and carried backpacks for other walkers. Praise the Lord. God is always good. Amen.

Samson earns his living now as a tour guide to trekkers on the Kokoda Trail. He like other guides can run the whole trail barefoot in three days carrying heavy backpacks!
