

Completely healed of AIDS by God

Life

My husband gave me the AIDS sickness when I was pregnant and the little baby also had it and died.

Because I had HIV and I stayed at home for 2 years. At my village they discriminated against me saying I had no right to wash where they normally wash or even go up to the mountains or wherever they go doing other things so they sent me away to stay somewhere else.

My husband left me and got married to another woman. I was worried so I drank alcohol and got sick and went to Goroka Hospital. For 10 solid months I was not eating anything in the hospital and I was very thin. The doctor put a drip on to my hand and said I would just lie around and wait for death.

During that time a spiritual sister came and witnessed to me about repenting, being baptized and receiving the Holy Spirit. I then got baptized. I was on medication for HIV but during the baptism time I forgot about taking medicine and was completely healed.

Now I have got very good health.

My unsaved husband is still on medication but I am completely healed.
