

Full blown AIDS healed by God

Life

I was married in 1997 and during that year I was living with other women also. In September I had a relationship with a lady who was infected with HIV/AIDS and she was just one of the many unrecognized wives that I had.

In 2002, she became very sick with many medical problems. Her diarrhoea got worse so she went to Kudjip General Hospital. Many tests were done, the HIV/AIDS test was also done and the doctor told her that she was infected with HIV/AIDS - full blown.

She went back to Port Moresby and went to her Nazarene Church there but died in December because she didn't know she needed to receive the Holy Spirit or get baptized. In 2004 and 2005 I got full blown HIV/AIDS with all the signs and symptoms. I was weak with so many sicknesses, including scabies for 3 years and a heavy cough. I lost about 30kg of weight, down to 52kg.

On 25/03/ 2005 I was witnessed by someone from Revival Fellowship. I got baptized and received the Holy Spirit and spoke in tongues. All my sicknesses and my hopelessness were gone.

After three days the scabs got dried, no more cough, my weight came back again, I was healed by God's power. My wife and our 5 children were tested and they were all HIV negative.
