

Breast regrew after surgical removal

Life

Sister Matilda - Vanimo, PNG

Sister Matilda had breast cancer. It grew fast. She went to the hospital and the doctors operated there and they removed the breast that had cancer and she was left with the breast on one side. After that she took the medication.

Later, she was baptized and received the Holy Spirit (5 January 1999) and she also prayed to the Lord, that the Lord would heal her.

After some months later she saw herself, that the nipple of her breast was coming up. She was thinking “Is it real or impossible?” When she saw that she was praising the Lord in her life and the Lord healed her and now she has the breast completely healed and she has both breasts now.

Now she is enjoying her salvation. She came to the 18th National Rally in Port Moresby, Revival Centres of PNG and the Lord blessed her.

(Sister Matilda’s testimony was translated as she spoke the words)
