

## INCURABLE CANCER IN HER BILUM BELONG PIKININI - 'WHERE THE BABY SITS' - BUT GOD HEALED HER!

*Here below is Jenny's story explained by a PNG brother in the Fellowship.*

**Jenny went around to plenty of local churches in PNG. She usually went around hearing all these sermons. Then she got this sickness and she prayed but God didn't hear her prayers. She was worried.**

Jenny went to the hospital three times. The first time she went to the doctor he gave her medicine. She had that medicine but that medicine didn't heal her sickness. She went a second time, then they operated and they sewed it back again and gave her medicine. The third time she went again. She had cancer in the bilum belong pikinini - 'the bag where the baby sits' - her womb. It was killing her, she would die instantly - very, very quickly; the medicine wouldn't cure her cancer.

One of the brothers told her that there's a church, the Revival Fellowship of Papua New Guinea, he just witnessed to her and told her all the stories about how she could get healings, and all this. She got baptised and received the Holy Spirit, that date is 30<sup>th</sup> July 2006. That time she was healed and she ended up in our Fellowship and she now walks along praising the Lord.

After she got her healing she went back to the doctor and the cancer wasn't there again. So she praises God as she goes along. It can't come back again. It's finished. Amen, and she's happy in our Fellowship.
