

HIV AIDS & paralysis

Life

Brother Ronnie and Sister Julie - Port Moresby, PNG

“I sat on a wheelchair for four solid months without standing up and without even walking. I knew I was paralysed for life.”

I was very sick so I took a blood test just to find out that I was HIV positive. My wife also took a blood test and she too was HIV positive. At that time she was pregnant with our second child.

On the day I got baptized I was carried into the water because I could not walk but after I got baptized I was miraculously healed by God as I was able to walk out of the water a free man.

My wife was healed and our baby girl was tested HIV negative.

“What a wonderful God we have. I had faith in Him and He healed my family.”
