

PRAISE THE LORD MY LIVER DAMAGE WAS HEALED

I got baptised 2008 on the 18th March after I was diagnosed with Hepatitis B by Doctor Mullar. The right side of my liver was damaged. I was alcoholic, I was addicted to alcohol and smoke and my liver got damaged. That has been the most thing that has affected me.

There is no cure, no medicine for both sicknesses he said. I obviously saw that there's no chance of me getting any treatment, so I had no hope. I went back home, I became so worried. I knew that God could help but that was not an option I had.

Actually, my wife, she has been in the Fellowship so I knew from some of the testimonies she told me. She actually invited me to go and observe the Fellowship but I didn't want to because in my school days, after I finished school I actually wanted to become a priest so I went to study priesthood.

I studied priesthood for four years and then for some reason I decided to quit, so I quit and I came out. After that I became fully employed officer, policeman. I am still serving as a policeman.

Praise the Lord; I got baptised from the date I mentioned earlier on. I did not receive the Holy Spirit until after one year. My sickness was still there with me. My pastors and leaders kept on encouraging me. They said don't leave fellowship here, that I should remain here, God's still in power. So I remain until I received the Holy Spirit, praise the Lord, I was healed.

I went to the doctor again, doctor put me on the scanning machine, went through, I wanted previous doctor's report, Doctor Mullar's report; and the doctor saw the report and said "Yes, the previous doctor's report confirmed the sickness but now there's no sickness in you".

Praise God. So from that date I feel that something take like a load off me, free. That's it, from then on I'm thankful. I am pleased to help the assembly.
