

Lung cancer healed

Life

Sister Jenny Lucas - Goroka, PNG

On 22 June 2003 I repented and my life testimony goes like this. I was a church goer, a pastor and I was sick in the womb. My husband was a sick person staying in the house for two years and couldn't get healed - he had lung cancer.

A sister invited him to a Revival Fellowship of PNG meeting and he repented, got baptized and received the Holy Spirit. I saw his attitude change and then his lung cancer was healed and now his life has changed.

So I followed my husband to Revival Fellowship house fellowship and I repented and was healed when I got baptised and received the Holy Spirit. Now I am changed and I am healthy today. I enjoy my salvation.
