

Miracle Mother and Baby

Life

Sister Rinah Moka - Gulf Province, PNG

Sister Rinah had some bleeding issues the week before she went into hospital to deliver her full term baby but the hospital staff sent her home and the bleeding stopped.

On the night she went into labour, she struggled to deliver her baby until she had no 'struggleness' (strength) left in her.

Spirit filled people from her fellowship and her family were contacted and came to the hospital to pray for her. She was in a critical condition. They were told to wait to see how she would deliver. Then she finally delivered her baby and the umbilical cord was tightly tied around the baby from the head right down to the toe - and tightened like a rope onto her. The Sister in charge of the Mothers cut the cord and put the baby on her tummy. She called it a "miracle baby" and a "miracle Mother" who had ever delivered such a miracle baby in their hospital in all the years!

Sister Rinah had been baptized and Spirit filled on August 2nd, 2003. She really praises the Lord for what He has done for her and their child. He is now four years old and a healthy happy child. They are all rejoicing in the Lord in their Gulf Province Fellowship.
