

I REALLY BELIEVED ONLY GOD WOULD HEAL ME

What took me to this Fellowship was in 1996 after sewing I thought to replace the sewing machine back in its place and then I had this blackout which I suffered, as though somebody punched me in the face or in the eye.

So, from 1996 to 1998 I suffered very badly. I was the mother of three small children. I couldn't look after my children because of the problem that I had. It caused me to experience a great pain. I couldn't bend over and put my head up or down. If I had to sweep I had to get down on my knees and sweep the floor. I couldn't turn my head left or right, I would move my whole body to the right or to the left to see who's behind me, I was doing that.

The doctor did not find out what was really wrong with me and what made me so sick. He gave me lots of medicines and tests but there was no change, just pain. I had this great pain like this for these two years. Never before in my life would I pray to God but because I had two years in great pain I started to pray to God and I really believed that only God would heal me and take whatever it was - take it away from me.

So in 1998 we had a Rally here and I went on the first day, on the 10th of October. I went and I attended and then I repented, got baptised and I spoke in strange tongues. I was filled with the Holy Spirit and when I came back home I was happy. I didn't get the instant healing, but never before in my life did I have peace in my life, but I felt this kind of peace that I never felt before in my life.

Then from then on I started to continue to attend Fellowship meetings and activities and as my faith continued to grow, suddenly I realised that God was healing me, until some years later God healed me fully and today I am enjoying my salvation and fellowship in the Lord. I can now look after my children; I can now stand and do my job as a mother and as a wife. I am very happy and I thank God.
