

# Paralysis from snake venom healed

Life

Sister Miriam cooks dinner for her family every day. She goes to the steep hills outside her village and gets small animals, snakes, fruit and vegetables. One day over 15 years ago she killed a snake that she didn't know was poisonous.

She took it home and cooked it in the pot and all her family ate it. Some were sick after that, but got better after a few days. Two weeks later she felt some pain in her heart then she changed, the poison partly paralyzed her so she could only move like a snake crawling on the ground. She would just sleep; her husband gave her very soft food like a snake could eat.

She was feeling a lot of problems and was looking all over for help but she couldn't find any help. Her husband took her to hospital to get some treatment, she slept in the hospital but the medicines couldn't help her. Her husband wondered what to do next for his wife. They tried all kinds of bush medicine but couldn't find any help.

Then Sister Miriam went back to hospital, she was put in a ward that was a very risky place, where people go and they never come back again. That ward was not good; it is the ward where they die.

Sister Analice from the Revival Fellowship came and told her there was a hope in Jesus Christ (Mark 16:16). She told her to go back home, repent, get baptized in the big water and God would heal her completely and forgive her sin. She would become a new being on this earth again.

Sister Miriam put this simple message into action and was taken to the hall where people fellowshiped. After all the testimonies she indicated she wanted to be baptized and she went down under the water of baptism. The first miracle for her was speaking in strange tongues that she never had spoken before.

God healed her completely from being paralyzed and moving like a snake. Soon after this she had a baby who is now 15 years old and in the Sunday School Ministry and then she has had 6 more healthy babies too. She knows God is with us and God helps us.
